SUMMARY

Engineering graduate with minor in **Artificial Intelligence and Machine Learning** from Pune University. Certified in 'Google Advanced Data Analytics Specialization' from Google Career Certification, adept at extracting meaningful insights from complex data sets. Focused on refining expertise in data science, regression models, and statistical analysis. Committed to identifying data-driven insights to drive optimal decision-making and business growth.

TECH STACK

Python Java SQL Tableau PowerBI pandas numpy scikit-learn Regression Analysis

Machine Learning Excel Exploratory Data Analysis Data Visualization DSA DBMS

EDUCATION

Bachelor of Engineering - Electrical Engineering

Savitribai Phule Pune University

📅 2020 - 2023

CGPA

9.34 / 10

High School Diploma - Electrical Engineering

VJTI, Mumbai

📅 2017 - 2020

percentage

94.3 / 100

PROJECTS

Weather Prediction for Next day

🔗 <https://github.com/SopanMore11/LogosticRegression>

weather prediction of rain for next day by using Logistic Regression concept. The project also includes data cleaning and Exploratory Data Analysis.

- Pandas, scikit-learn, Logistic Regression, seaborn, plotly.express, matplotlib, Numpy,
- Exploratory Data Analysis, Data cleaning, Feature Scaling, Model training and Validation,

Parking Reservation System

Android application was developed for booking parking slot remotely. The project also consisted the use of sensors to detect car presence.

- Android Studio, Java, XML, Firebase realtime database, Arduino, NodeMCU, C, Firestore Database

TRAINING / COURSES

Advanced Data Analytics

Google Career Certifications [Coursera]
Python, Data Analytics, Data cleaning and
Vidualization, Tableau, Machine Learning.

Machine Learning Foundations

LinkedIn Learning
Probability theories used in Machine Learning.

Coursera
Financial data analysis, Google Sheets, Probability
and statistics

EXPERIENCE

Subject Matter Expert | Freelance

Chegg India

📅 02/2021 - 08/2022

- Problem solving and providing good quality solutions to the questions asked by students. Developing logic for students to understand the solutions provided. Producing solutions with prescribed criteria in order to adhere to regulations.
- Mathematics, Linear algebra, Control Systems, Probabilities, Statistics.

ACCOMPLISHMENTS

Minor in Artificial Intelligence and Machine Learning

Completed two years of additional course in AI&ML offered by University.
